The EMM-64K is an extended memory module for the Merlin AVL device. The EMM-64K can store up to 65,536 GPS messages in internal memory. The EMM-128K expands the memory capacity, doubling the stored GPS messages to 131,072.

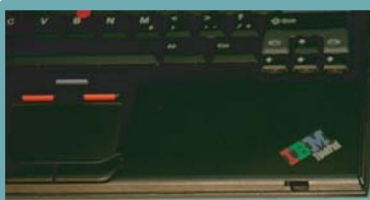

EMM-64K

- ◆ Connects directly to Merlin AVL. No external power needed.
- ◆ Reduce or eliminate air time usage while maintaining accurate tracking.
- ◆ Easily download stored data using MDU-485 PC Interface.
- ◆ Stores 65,536 position fixes, plus vehicle number in non-volatile memory. Optional memory for 131,072 positions.
- ◆ Includes 1' cable (Optional 6' cable).
